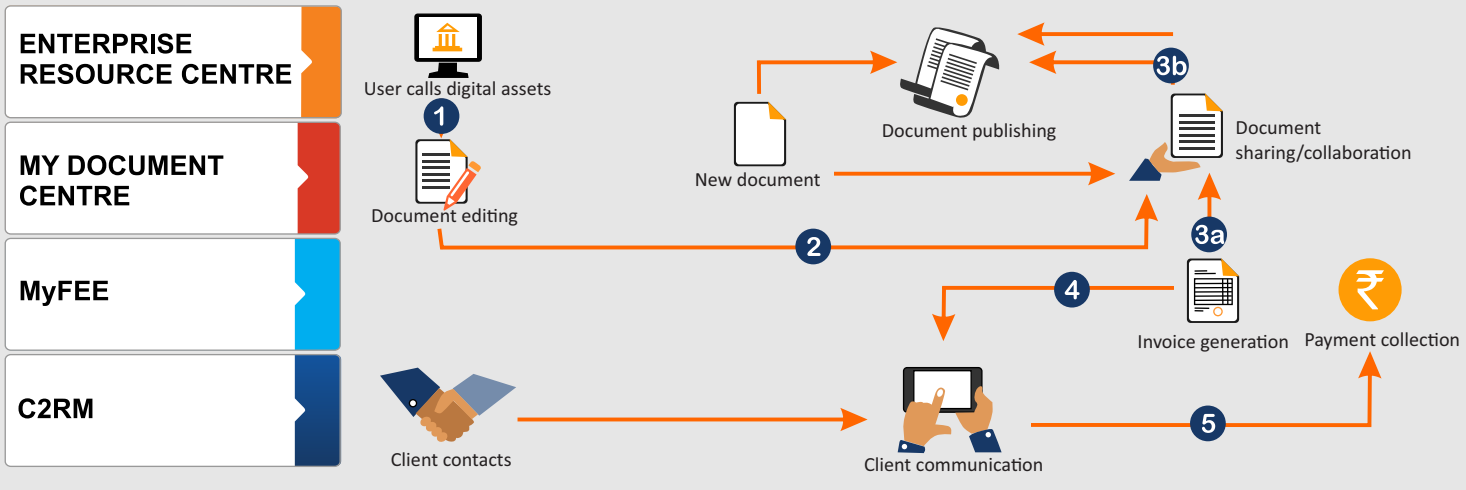
Workflow



SoOLEGAL

SoOLEGAL Enterprise Services

The future of legal e-infra, transforming legal operations and law practices

SoOLEGAL Enterprise Services (SES) are Intranet/Cloud-based ecosystem of tools and apps specifically catering to the operational needs of law firms and legal professionals. SES integrates with SoOLEGAL's productivity apps and other tools and offers several compelling features such as workflow management, calendar management, document indexing, and storage to name a few.

The largest private global initiative in digital space for law

SoOLEGAL, a first of its kind legal e-governance technology platform, provides complete end-to-end services to lawyers, para legal officers (CA, corporate compliance officers etc), and law firms for optimizing, streamlining and increasing efficiency of individual professionals and the practice. The platform offers the legal fraternity an unmatched array of services. Key areas include case / practice management, document management, document storage, billing, invoicing, e-payment system, CRM, marketplace for clients to connect with lawyers and legal process outsourcing among others. Currently the platform has a huge online community of local and global members who are legally qualified to offer services as advocates, or simply as lawyers and advisors.
